# What is DEEPer ?

**DEEPer** is a training programme created by industry specialists to help train people for the digital and software engineering industry.

It teaches coding in PHP and the skills needed to integrate and work within the fast-developing growing sector.

Creating the Software Engineers to develop the future

Our 12-week training programme, is initially delivered virtually utilising video calling programmes.

Candidates will need to commit 22 hours per week, which will include 1 day of F2F (virtual) classroom learning.

How DEEPer is delivered.

# WHO IS BEHIND DEEPer?

Together Enterprise4All, CBP and Magma are ideally placed to develop this programme to create the digital engineers of the future.

Backed and funded by The Digital Skills Partnership Lancashire with GMCA and Lancashire LEP.

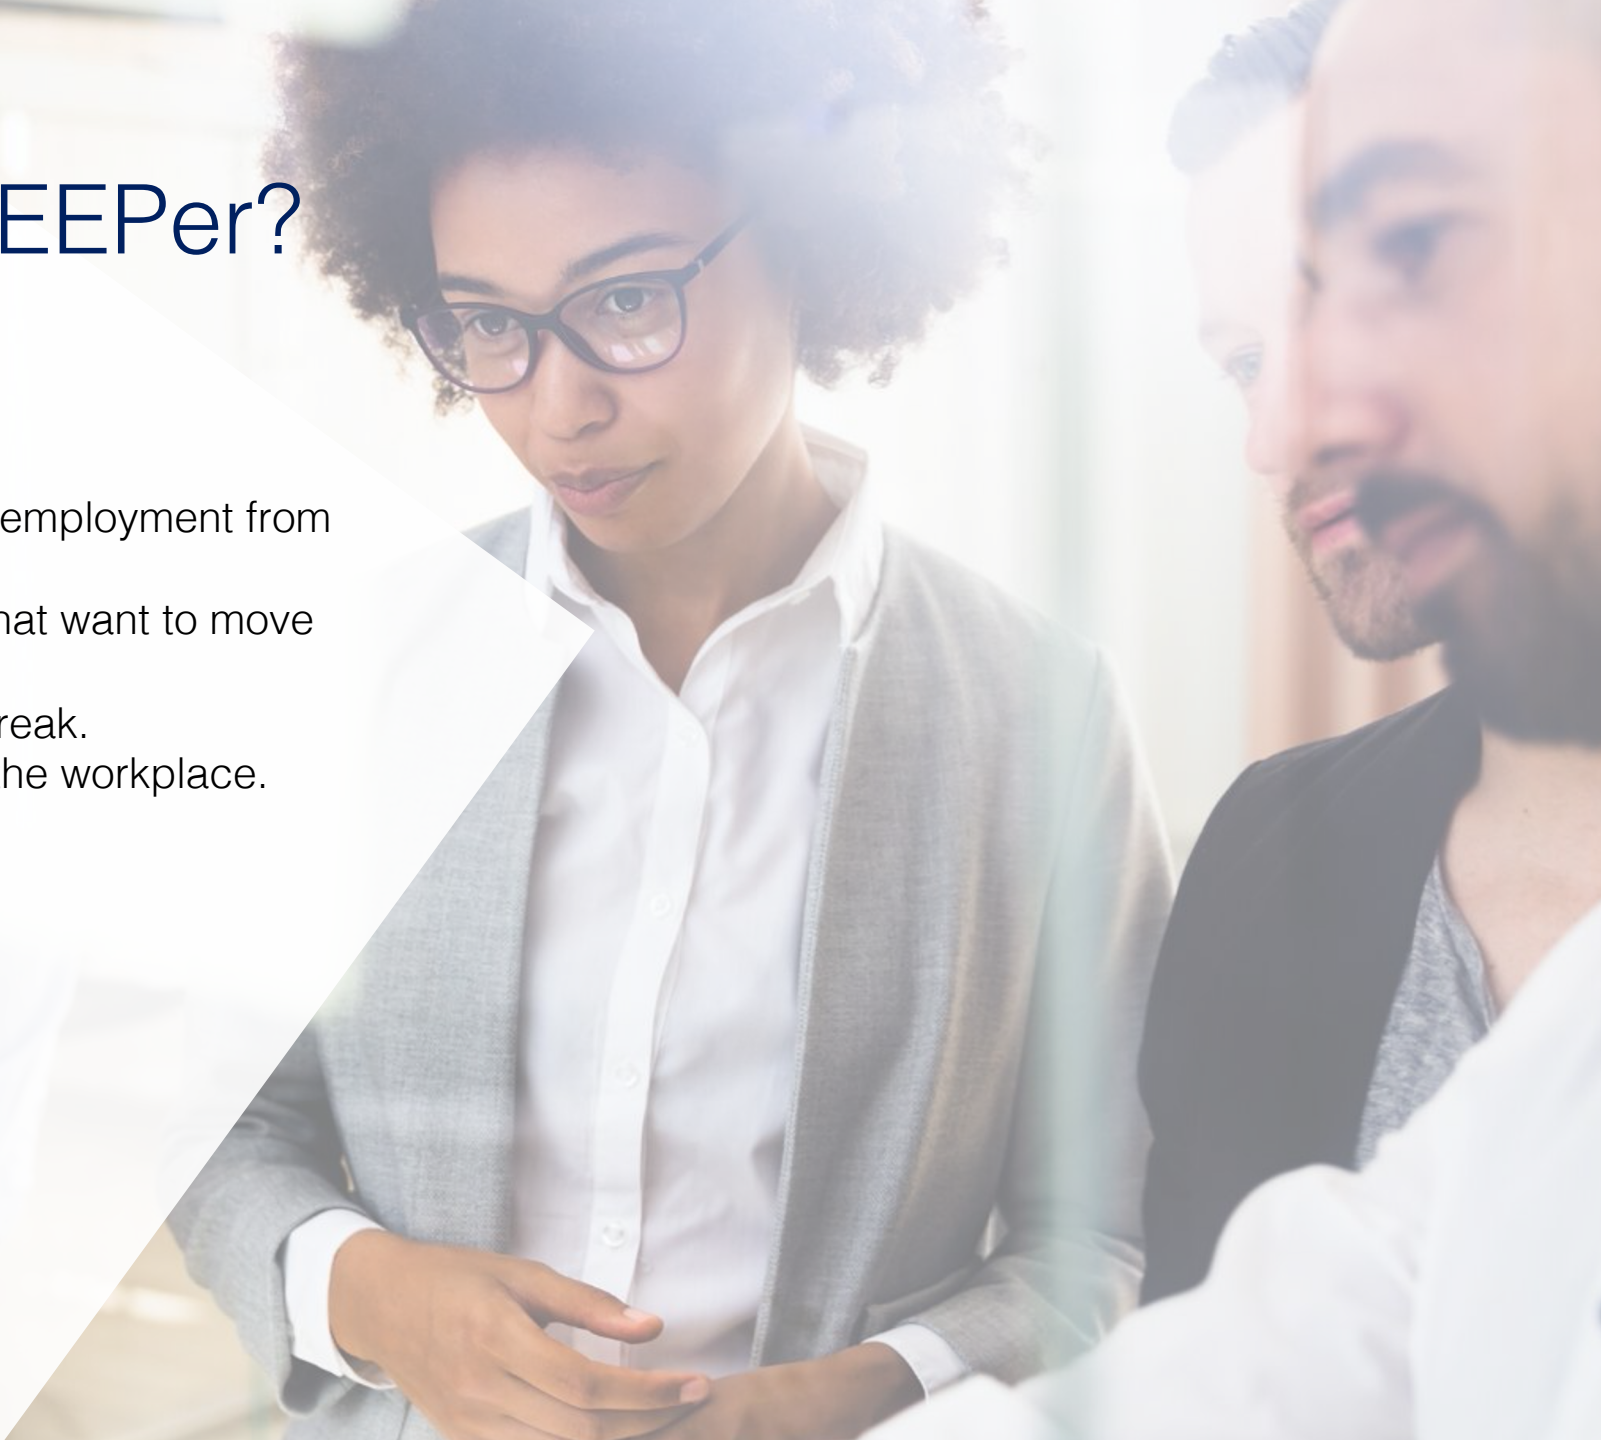

# Who is eligible for DEEPer?

## People eligible for this programme:

- People wanting to break into this area of employment from any IT based skilled background
- People working within the digital sector that want to move into software development.
- People looking to return to work after a break.
- Unemployed graduates looking to enter the workplace.
- People looking for a career change.

## We are looking for people with

- The **commitment**
- The **time** to give
- An **open mind** to develop

# Removing the barriers

To ensure there are no blockers to your learning we provide:

- Laptop on loan
- Software licenses
- Broadband connection if needed
- Travel costs as required
- Help if required with specific learning needs
